

Air Steps

Airsteps

The Airsteps are small and handy. They are perfect for home use and also make a great addition to the Airtrack by, for example, stacking the steps.

Ease of Airsteps

The Airsteps are easy and quick to set up. With a high-pressure blower or foot pump, this mat is pressurized within minutes and retains its pressure for hours. The pressure is also easy and quick to adjust by opening the valve on the side of the mat. The mat comes with a pressure gauge. The pressure gauge accurately measures the pressure inside the track, perfect pressure is important for the correct use of the mat. The pressure gauge is connected to the second valve of the track when the mat is inflated.

The mat is airtight and quiet, as there does not need to be a blower constantly connected to the mat.

Multifunctional

The Airsteps are smaller inflatable mats that are very versatile. The mats can be placed on any floor. Use the mats in the house for training, for example. Stack several mats on top of each other and place them on or in front of an Airtrack for better lift or with jumping exercises. Connect the Airsteps with the Trackconnect and place the mats upright so that they form a soft wall or partition.

Dimensions:

Step 1: length= 2m width= 0.8m height= 0.30m

Step 2: length= 2m width= 0.6m height= 0.30m

Step 3: length= 2m width= 0.4m height= 0.30m

Inflated product

Length	7ft
Height	1ft

Specifications packaged product

Weight	88lbs
